Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/791,661	Applicant(s) ROBINSON, DANE Q.	
	Examiner Pedro Philogene	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 4 is rejected under 35 U.S.C. 101 because it is drawn to non-statutory subject matter. In claim 4, line 1, applicant positively recites part of a human, i.e. "the bone is a jaw bone of a human". Thus the claim includes part of a human within its scope and is non-statutory.

A claim directed to or including within its scope a human is not considered to be patentable subject matter under 35 U. S. C. 101. The grant of a limited, but exclusive property right in a human being is prohibited by the constitution. In re Wakefield, 422 F. 2d 897, 164 USPQ 636 (CCPA 1970).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-20,23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson (6,394,807).

With respect to claim 1, Robinson discloses a device to assist in regenerating bone, the device configured to at least partially surround the bone to be regenerated and defining a cavity (13) next to the bone, the cavity for retaining a material (14) next to

Art Unit: 3733

bone, the material comprising a substance for stimulating bone growth, wherein the device includes a plurality of first openings (44 and openings inside strut (48) and one or more second openings (41) through which the material may be placed into the cavity, wherein each of the one or more second openings are larger than each of the plurality of the first openings; as best seen in FIGS 18-21.

With respect to claims 3-20, 23-27, Robinson discloses all the limitations, as set forth in column 7, lines 65-67, column 8, lines 1-65; and as best seen in FIGS.1-21.

It is noted that Robinson did not teach that the device is comprised of wire mesh; as claimed by applicant. However, in a similar art, Robinson evidences the use of a device comprising a wire mesh comprising wire mesh, therefore, the use of wire mesh to form a cage and secure material in the cavity as disclosed by Robinson is old and well known in the art. Furthermore, Robinson discloses a plurality of struts forming large and small openings to secure the material to the cavity, therefore the connection of the small and large struts would form a wire mesh to secure the material in the cavity.

Response to Amendment

Applicant's arguments with respect to claims 1, 3-20, 23-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
